

Structural Creativity is
building meaning into making

structiv

structiv.co.uk

Structiv exists to help designers and architects weave their dreams into steel and bronze.

Our ongoing quest is to let design be embedded ever deeper into the fabric of our environment.

Simon Dexter-Jones,
founder

If the materials we build with told their own story, what would they say?

Steelweave is in use on commercial, industrial, community, residential and customer-facing sites in Europe, Asia, Oceania and the Americas.

Design should never be an afterthought. Even the humblest garden fence longs to whisper meaning into the world.

Steelweave is an evolutionary technology that threads meaning and play into the built environment.

Steelweave brings together the strength, lightness and durability of chain-link and welded mesh fence with the ability to specify intrinsic design from an EPS, DXF or PDF file.

Invented in the Netherlands and woven at specially built factories in India, Steelweave is a fusion of three technologies. It takes the intricate lace-making craft of the Renaissance Low Countries, and combines it with the Industrial Revolution innovation of Charles Barnard who scaled his cloth weaving machines up to invent the chain-link process in 1844, and directs it with 21st century computing power.

Steelweave, Bronzeweave and Copperweave are exclusively available in the UK through Structiv.

Silicon Evolution

structiv

Revolution is over-rated: Our ancestors understood passion and beauty. Design desires evolution.

Talk to us

Availability:
12-16 weeks delivery

Specification:
From your PDF or illustration, or from our pattern book

Variants:
Steelweave
Copperweave
Bronzeweave

Welded mesh
Chain-link

Colours:
Native
Powder coated (RAL)

When you contact us in order to bring your idea to life, we require a brief description of your project and your desired outcome.

Having discussed this with you, we need to understand the relevant measurements (panel size, linear meterage and square meterage) and whether you wish to include colour powder coating and/or frames within your project design.

We then work in close collaboration with you, working from your provided design, image or drawing (or indeed working with you to select a pattern from our own pattern collection) to create a visual, which we will send to you, of how the finished product, could look.

Once this is agreed we will commence production. Our products are handmade by professional craftspeople to exacting standards; we value your creation not to be rushed but to deliver what will be a lasting legacy for you. For that desirability, our products take an average twelve to sixteen weeks for delivery from order.

A woman with blonde hair, wearing a dark blue turtleneck, is smiling and pointing at a woven metal mesh. A man in a dark blue suit is also pointing at the mesh. They are standing in front of a brick wall with a blue door.

“Structural Creativity is about changing the world, by design.”
